## Summary

Full-Stack Developer with nearly four years of experience delivering web applications across hospitality and content platforms using React, Next.js, Node.js, and NestJS. Builds user-facing products, API integrations, backend workflows, and publishing automation. Work includes an AI concierge, a 40% load-time reduction, and Node.js services handling 10,000+ client requests daily.

## Technical Skills

**Languages:** TypeScript, JavaScript, Python

**Front-End Technologies:** React, Redux, Bootstrap, Tailwind CSS

**Back-End Technologies:** Node.js, Express.js, NestJS, RESTful APIs, GraphQL

**Databases:** MongoDB, MySQL, PostgreSQL

**Other:** Next.js, LangGraph, Mastra AI, Jest, React Testing Library, Git, GitHub, Linux

## Experience

### Contentstack

**August 2025 – Present**

*Software Engineer*

*Mumbai, Maharashtra (Hybrid)*

- Built Contentstack's Digital Concierge and partnered with Marketing to launch it within two weeks. In its first month, it handled 590+ queries across 260+ conversations, answered approximately 80% of queries, and directed approximately 17% of conversations to demo or free-trial calls to action.
- Developed Contentstack's first Instagram and Facebook integration using Python and the OpenAI SDK, enabling customers to adapt CMS blog content and publish it directly to both platforms.
- Led a three-week redesign of Contentstack's documentation site using Next.js, reducing page-load time by 30% compared with the previous design, as measured through Lighthouse and Core Web Vitals.
- Built a Git- and pull-request-based publishing workflow for the Product team, reducing manual documentation publishing effort by 80% while retaining human review.
- Developed frontend and backend components for the Contentstack Academy redesign using Next.js and NestJS, supporting 1,000+ daily course-start, completion, and learning-path enrollment requests.

### STAAH Hotel Software by Access group

**November 2022 – July 2025**

*Full-Stack Developer*

*Surat, Gujarat*

- Led frontend development for the Booking.com integration, building an isolated React module and connecting it to the main application through Module Federation and APIs. The integration supported the onboarding of 1,000+ properties within two months.
- Delivered 50+ modules across third-party integrations and product capabilities, extending functionality within existing applications.
- Engineered Node.js and Express.js business workflows handling 10,000+ client requests daily, with authentication, authorization, data encryption, and global error handling for a service used by 1,000+ users.

## Projects

### Techluous | *Next.js, React, TypeScript, Supabase, PostgreSQL, Zod, Vercel API*

**July 2026**

- Built a full-stack website builder enabling authenticated users to create projects, customize schema-generated content, preview responsive changes, and publish websites without editing source code.
- Designed a schema-driven architecture using Zod as a single source of truth for form generation, validation, draft/published content, and runtime rendering.
- Implemented a secure Vercel deployment pipeline with OAuth, Vault-backed credentials, signed webhooks, deployment state transitions, concurrency control, and out-of-order event protection.

### Marketing Website | *Next.js, React, TailwindCSS, Framer Motion, VPS*

**February 2025**

- Configured and secured a VPS, established SSH access, and deployed the Next.js application as a live website.
- Built a CI/CD pipeline that automatically deployed updates to the VPS whenever code was pushed to the main branch.
- Developed the responsive front end using Next.js, React, TailwindCSS, and Framer Motion, with a focus on SEO and accessibility.

## Education

### Uka Tarsadia University

**July 2018 – May 2022**

*Bachelor of Technology, Automobile Engineering*

*Bardoli, Gujarat*
