

HARSHITHA D

Backend & Platform Engineer | SDKs · CLI · Developer Experience

harshithad0703@gmail.com | +91 7090 673 299 | Bengaluru, Karnataka | github.com/harshithad0703

PROFESSIONAL SUMMARY

Backend and Platform Engineer with 3+ years of experience architecting developer platforms, multi-agent workflows, and MCP (Model Context Protocol) servers. Specialized in building reliable SDKs/CLIs, scaling distributed system integration, and hardening platform security for enterprise AI solutions. Strong background in distributed systems, data security, and reliability engineering, with a track record of owning services end-to-end from design through production support

SKILLS & TECHNOLOGIES

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS, YAML

Tooling & Practices: Git/GitHub, CI/CD (GitHub Actions), TDD, System Design fundamentals

AI & Emerging Tech: MCP server development, Prompt Engineering (Claude, OpenAI, Cursor AI, GitHub Copilot, Amazon Q)

PROFESSIONAL EXPERIENCE

Contentstack

Associate Software Engineer

Jul 2023 – Present

Bangalore, India

- Architected and deployed an **MCP** (Model Context Protocol) server with **65+ AI-agent tools**, exposing CMS REST APIs as callable functions to enable autonomous agentic workflows and intelligent solution delivery.
- Consumed and helped shape the **content management and content delivery REST APIs** while building client SDKs, participating in API design discussions with the platform team.
- Designed and shipped **reusable content-schema support** for the Java SDK, letting API consumers reuse shared field definitions across content types instead of redefining them per type — reducing schema duplication for integrating teams.
- Built a set of **query-builder operators** (containedIn, notContainedIn, notExists, and/or logic, reference filters) for the **JavaScript/TypeScript SDKs**, expanding the range of queries API consumers could express.
- Built **CLI commands for bulk taxonomy publish/unpublish and API rate-limit management**, letting customers act on large sets of taxonomies across locales, environments, and content types in one command, and view/configure their own rate limits — instead of one-by-one UI actions or filing a support request.
- Practiced **TDD**, achieving **90%+ test coverage** across SDK enhancements/features and CLI command logic, to protect backward compatibility and catch regressions before release.
- Served as **Release Manager** for the DevEx ecosystem, owning end-to-end release lifecycle for SDKs and CLI tools across multiple repositories and languages (JS/TS, Java, Python, Ruby, Swift, .NET, Dart, PHP).
- Improved **CI/CD pipelines (GitHub Actions)** for automated build, release, and deployment across SDK and CLI repositories.
- Applied security and reliability engineering to platform integration systems, **mitigating NoSQL and SSRF** vulnerabilities to ensure strict data governance and system stability.
- Open-source repositories worked on: [cli](#), [cli-plugins](#), [typescript-sdk](#), [javascript-sdk](#), [java-sdk](#)

Contentstack

Associate Software Engineer Intern

Jan 2023 – Jul 2023

Bangalore, India

- Assisted in development and maintenance of **SDKs** handling structured content models and API integrations for automated content processing workflows.
- Improved SDK compatibility and performance through optimized API call handling; supported internal testing, documentation automation, and release validation.

PROJECTS

Chhalaang 4.0 Hackathon — Top 10 Finalist (Nationwide)

- Engineered a full-stack triage system integrating **Google Gemini NLU** and **agentic scheduling** workflows to **automate** real-time intake, severity scoring, and alert routing.

Tech: Node.js, Express.js, React, SQLite, Google Gemini API, Google Calendar API

ACHIEVEMENTS

- Thank You Award** — recognized for proactively managing DevEx releases, ensuring on-time delivery and maintaining feature-parity documentation across SDKs.
- Contentstack Team Award (FY24 Q4)** — awarded for exceptional performance, ownership, and dedication within the Developer Experience team.

EDUCATION

- B.E. in Information Science & Engineering, VTU (2023)** — GSSSIETW, 8.57 CGPA
- 12th Std, KSEAB (2019)** — KMWA PU College, 82.50%
- 10th Std, ICSE (2017)** — Ganga International School, 87.40%
