

SUMMARY

Software Engineer with 5+ years of experience building scalable Node.js and TypeScript backend and distributed systems. Experienced in high-scale APIs, Redis, PostgreSQL, messaging systems, observability, and AWS infrastructure, with a focus on reliability, performance, and production ownership.

EXPERIENCE

Contentstack India Pvt. Ltd.

Mumbai, India

• Software Engineer — Launch

April 2023 - Present

- Implemented **Redis-based LRU caching** for the product's largest service handling **150M+ requests/day**, and reducing p95 API latency from **200 ms to 25 ms**.
- Architected a **distributed rate-limiting service** using a **hybrid token bucket algorithm and Redis**, achieving **49 µs p95 request evaluation latency** while enforcing traffic controls across multi-tenant infrastructure.
- Implemented **20+ Public REST API endpoints** enabling third-party integrations supporting **OAuth 2.0 machine-to-machine authentication, OPA-based authorization**, and fine-grained scopes
- Designed and implemented an extensible telemetry pipeline that **processes 50M+ logs/day** using **OpenTelemetry**, enabling **ingestion, processing, and export of deployment logs** over HTTP and gRPC.
- Built and rolled out an **agentic software delivery workflow** used by **15 engineers** to process **25+ PRs/day**, automating security checks, linting, code commits, pushes, PR creation, and team notifications; periodically monitors Copilot review comments and resolves applicable feedback.
- Resolved 30+ complex production issues during engineering on-call rotations, driving root-cause analysis, and translating customer feedback into platform improvements.

• Associate Software Engineer — Technical Services

June 2021 - March 2023

- Developed a reusable application framework adopted across the product ecosystem, **reducing new product development time by 45%** while standardizing project architecture and integration workflows.
- Built and published **30+ third-party Marketplace Apps** used to extend CMS capabilities across **e-commerce, search, DAM, and translation**, integrating external services and APIs to deliver reusable solutions for enterprise customers.
- Configured and customized Contentstack's headless CMS to deliver **tailored solutions for a portfolio of 20+ enterprise clients**, translating business requirements into scalable implementations.

TECHNICAL LEADERSHIP & COMMUNITY

- Speaker – React India:** Presented a conference talk on **Web Workers**, covering browser concurrency and performance optimization.
- Speaker – GDG DevFest Ahmedabad:** Delivered a technical talk on **Web Workers** to the regional developer community.
- Community Organizer – TechX by Contentstack:** Organized and hosted **6 engineering meetups** with **50+ attendees** each, featuring speakers on software engineering and platform technologies.
- Speaker – TechX by Contentstack:** Presented **How Web Hosting Works**, covering hosting architecture, CDNs, deployment workflows, and request lifecycle.

EDUCATION

• Bachelor's in Computer Engineering

Aug. 2018 – June. 2021

Mumbai, India

• Diploma in Computer Engineering

Aug. 2015 – March. 2018

Mumbai, India

SKILLS

Languages: TypeScript, JavaScript, Go, Lua

Backend: Node.js, NestJS, REST APIs, OpenTelemetry

Databases & Caching: SQL, PostgreSQL, MongoDB, Redis

Cloud & Infrastructure: AWS, Kubernetes, Terraform, Docker

Messaging: RabbitMQ, Kafka

Frontend: React.js, Next.js
